

Function Development

Focus:

- central repository for all variable declarations of an ECU project
- ensures consistency between the ECU source code and the ASAM description files
- SW implementation

Focus:

- global, company - wide label database
- single source of all data declarations
- specification view, no implementation details

Focus:

- Automated documentation of Matlab / Simulink and ASCET models
- Combine model-, data dictionary and calibration information
- Viewer/Editor with extended features
